

# IDL Energy Policy Statement

2025/V.1

Inverterek Drives Limited make variable frequency drives, which themselves, are designed to reduce energy consumption when installed.

Our aim at IDL is for continual improvement in Energy Performance. This includes, where possible, preventing energy consumption at source, taking into consideration business objectives, employees, the local community and continual improvement of the Energy Management System.

This Energy Policy statement covers all activities of the organization whether directly or indirectly involved in the manufacture of its finished products and supporting infrastructure at our Welshpool site.

IDL are certified to ISO 14001:2015 and commit to the following:

- 1.** To uphold legal and other requirements regarding energy use, consumption and efficiency.
- 2.** To ensure continual improvement in our energy performance and building management.
- 3.** To ensure information and resources to achieve our objectives and targets.
- 4.** To minimise energy usage through consideration of energy performance improvements in design and modification of our facilities, equipment, systems and processes.
- 5.** Establish, measure and review objectives and targets for the reduction in use of gas and electricity.
- 6.** To install photovoltaic cells at our Welshpool site.
- 7.** To reduce any processes where energy concerns exist, where practicable.
- 8.** To ensure that future manufacturing processes and related service activities are given due energy usage consideration.
- 9.** To communicate this policy to our customers and suppliers to encourage their involvement, by displaying it on our website [www.inverterekdrives.com](http://www.inverterekdrives.com).
- 10.** To promote and encourage policy awareness amongst employees.
- 11.** To support the purchase of energy efficient products and services, and design for energy performance improvement.
